

Air purifier & humidifier 2-in-1 combination device

IDEAL

Air purifier & humidifier

For healthy indoor air and ideal feel-good climate. The combination device with multi-level filter technology combines air purification with ideal humidification. Optionally, it can also be operated as an air purifier without water.

	AP35 H
For room sizes of* (sqm)	25 – 45
Air purifier & humidifier (2-in-1 combination device)	●
Operation as air purifier (without humidification) possible	●
Cleaning performance up to (m ³ /h)	up to 300
Air exchange rate* (min.)	15
Humidification performance	up to 300
Hygienic cold evaporation system	● evaporator cassette
Fan stages	6
Power (watts)	4 – 25
Noise levels (dB)	26 – 52
Timer function	●
4-step automatic mode	●
Multi-function control display	with numerous menu options
Various comfort modes	●
Ionizer	● switchable
Intelligent sensors	● particulate matter, VOC, air humidity
Indication of air quality	● LED lighting elements, PM 2.5 values
Indication of air humidity values	●
HEPA filter	●
Deodor filter against odours	●
Removable water tank	2.5 litres
Filter change interval (in months)	approx. 12
Change interval of evaporator cassette (in months)	approx. 4
Housing material	plastics
Dimensions (H x W x D), mm	548 x 430 x 275
Mobile on castors	●
Weight (kg)	9.5

The technical data is approximate. Subject to change. Printed in Germany. 11/2019

* With a room height of 2.50 m

Controlled air humidification
The combination device automatically controls air humidification and ensures ideal air humidity by means of a hygienic cold evaporation system.

Super-silent operation
A distinctive feature of the device is its low running noise. This makes it ideal for sleeping rooms and children's rooms.

Smart Air
The intelligent air sensor system continuously measures odours as well as particles and determines air quality to control the air purifier in automatic mode.
