Perfect shine in no time at all –  
time-consuming manual folding  
is a thing of the past!

**Folding machines**

# Office folding machines

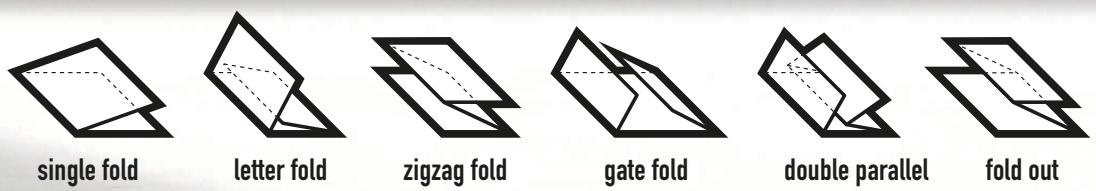

## Accurate, precise and automatic.

IDEAL folding machines give you the simplicity and versatility to complete a wide variety of folding jobs within minutes.

Time is money – so true when it comes to daily mailing in secretarial and sales offices, or in accounts departments. IDEAL folding machines offer a choice of different folds and formats, and in a matter of seconds prepare letters, circulars, flyers, invoices and statements for easy insertion into envelopes. Operation is extraordinarily simple. Load the feeding table with a stack of paper, refer to symbols and colour codes illustrating the type of fold, set the paper positioning, and at the push of a button your letters and documents are folded.

# 8306

## Compact entry-level model: Manual folding machine for A4 and 12". With 4 fold types and stream delivery paper ejection

- Easy setting of the fold stops on the two folding pockets (fold symbols and colour code indications)
- Fold-out feeding table for 150 sheets of paper
